

Arjun Mehta *Machine Learning Engineer | AI Developer*

✉ arjun.mehta.ai@gmail.com ☎ 9876543210 📍 Bengaluru, India

PROFILE

Machine Learning focused software engineer with strong experience in Python based AI systems, data analysis, and backend development. Skilled in building ML pipelines, model training, and deploying scalable AI applications. Interested in solving real-world problems using machine learning and data engineering.

SKILLS

Programming Languages — Python, SQL, C++, JavaScript

Machine Learning & Data Science — Scikit-Learn, TensorFlow, Pandas, NumPy, NLP, Data Preprocessing, Model Evaluation

Backend Development — Django, REST API Development, PostgreSQL, Redis

Cloud & Tools — Git, Docker, Linux, AWS Basics

Core Concepts — Machine Learning Algorithms

Data Analysis — Model Training & Evaluation

API Development

PROFESSIONAL EXPERIENCE

AI Developer

DataMind Labs

07/2023 – Present | Bangalore, India

- Developed machine learning models for classification and prediction using **Python, Scikit-Learn, TensorFlow and Pandas**.
- Built **NLP pipelines** for resume analysis and text similarity scoring.
- Designed **REST APIs using Django** to deploy machine learning models into production systems.
- Performed **data preprocessing, feature engineering and model evaluation** to improve prediction accuracy.
- Collaborated with backend teams to integrate ML services into scalable applications.

Backend Developer

TechNova Solutions

01/2022 – 06/2023 | Hyderabad, India

- Developed **Django based backend systems** for data processing applications.
- Designed **REST APIs and database models using PostgreSQL**.
- Implemented **data processing pipelines using Python and Pandas**.

EDUCATION

B.Tech – Computer Science (AI & ML)

Graphic Era University

2022 – 2026 | Dehradun

CGPA: 8.4 / 10

PROJECTS

AI Resume Ranking System

Developed a machine learning powered ATS system that ranks candidate resumes against job descriptions using text similarity and weighted scoring algorithms.

Technologies: Python, NLP, Scikit-Learn, Django
Features:

- Resume parsing and keyword extraction
- Similarity scoring between resumes and job descriptions
- Ranking candidates based on skills match percentage

Job Recommendation Engine

Built a recommendation system that suggests jobs to users based on their skill profiles and experience level.

Technologies: Python, Pandas, Machine Learning
Features:

- Skill similarity calculation
- Job relevance ranking
- Personalized recommendation output

NLP Text Analyzer

Created an NLP based system to analyze textual data and extract meaningful insights from documents.

Technologies: Python, NLP, Scikit-Learn
Features:

- Tokenization and feature extraction
- TF-IDF vectorization
- Similarity based classification
