Profile

Final-year Computer Science Engineering student with a 9.32 CGPA, strong skills in software development, data structures and algorithms, and scalable system design. I am proficient in Python, Java, and C++. I have hands-on experience in web technologies, databases, and AI/ML projects. I am passionate about problem-solving, backend engineering, and building secure, high-performance systems..

Skills

Programming Languages

Python-Primary, Java, C++, C, JavaScript, PHP

Data Structures and Algorithms

Proficient in complex data structures and algorithm design

Databases & Tools

MySQL, GitHub, Linux, VS Code

Web Development

- **Technologies:** HTML, CSS, JavaScript, PHP
- **Frameworks & Libraries:** React and MongoDB

Artificial Intelligence & Machine Learning

Basics of AI/ML algorithms including K-Means, Naïve Bayes, and CNNs.

Projects

Mini Lexical Analyzer

Developed a lexical analyzer in C++ to parse source code and convert it into a sequence of meaningful tokens like keywords, identifiers, and operators. This project demonstrates a strong, practical understanding of compiler design principles and finite automata.

Shopping Mart Management

Developed a comprehensive Shopping Mart Management System designed to streamline retail operations. The system includes features for inventory management and billing. The project is built using python(tkinter).

Spam Email Detection

Using NLP approaches, a machine learning model was developed to categorize emails as either valid or spam. improved the accuracy of email filtering by using TF-IDF vectorization for text processing and training classifiers such as Naïve Bayes and Logistic Regression.

Gender and Age Detection

Has developed a deep Learning-based model for the determination of gender and age with facial images employing the UTKFace data set. Convolutional neural networks (CNNs) were implemented with TensorFlow/Keras for feature extraction and classification. achieving accurate prediction for both real-time as well as static images.

Education

Dehradun, India

Bachelor of Technology

Graphic Era Deemed To Be University

- 9.32 GPA/CGPA, Expected May 2026
- Applied software development and machine learning principles in key projects such as Spam Email Detection and a Mini Lexical Analyzer.

Vijayawada, India	Higher Secondary Education <i>Sri Chaitanya Junior College</i> 9.56 GPA/CGPA
Vijayawada, India	Secondary Education <i>Narayana EM School</i> 10 GPA/CGPA

Certificates

- Amazon Skill Builder Certificates on various topics like GenAI, MachineLearning, etc;
- Salesforce Developer Champion Program (SmartBridge & AICTE) - 2025

Languages

- English

- Hindi

- Telugu

Professional Experience

2025/05 – 2025/07

Salesforce Virtual Internship — Remote | 8 Weeks

- Completed a structured internship program focused on **CRM, cloud applications, and software development fundamentals**.
- Gained hands-on experience with **Salesforce platform tools**, including cloud-based app configuration and automation.
- Worked on mini-projects simulating real-world business use cases, strengthening problem-solving and adaptability skills.
