

Akula Sai Santhosh Kumar

Backend Developer | Python | Django | REST API | PostgreSQL | React | Git

Professional Summary

Final-year Computer Science Engineering student with strong backend development experience using Python and Django. Experienced in building RESTful APIs, integrating PostgreSQL databases, and developing scalable full-stack applications with React. Proficient in Git version control and collaborative development workflows. Focused on writing clean, optimized, and testable code.

Technical Skills

- Programming: Python (Primary), Java, C++
- Backend: Django, REST API development, MVC architecture
- Frontend: React, HTML, CSS, JavaScript
- Databases: PostgreSQL, MySQL
- Tools: Git, GitHub, Linux, VS Code
- Concepts: Data Structures & Algorithms, Scalable System Design

Professional Experience

- Developed backend services using Django and implemented RESTful APIs for scalable web applications.
- Designed and integrated PostgreSQL databases with optimized queries for performance.
- Worked on full-stack features combining React frontend with Django backend APIs.
- Collaborated using Git-based workflows and maintained clean version control practices.
- Completed Salesforce Virtual Internship (Remote) focusing on cloud applications and backend logic.

Projects

- Built a Django-based REST API system for managing scalable web applications.
- Implemented authentication, CRUD operations, and API endpoint optimization.
- Developed a Mini Lexical Analyzer in C++ demonstrating strong compiler design fundamentals.
- Created a Spam Email Detection system using machine learning and NLP techniques.

Education

Bachelor of Technology in Computer Science Engineering | Graphic Era University | CGPA: 9.32 |
