Professional Summary

Machine Learning Engineer with 2+ years of experience developing and deploying ML models for data-driven applications. Experienced in building NLP pipelines, model optimization, and integrating machine learning services into production systems using Python, Scikit-learn, TensorFlow, and Pandas.

Technical Skills

Programming	Python, SQL
ML Frameworks	Scikit-learn, TensorFlow
Data Tools	Pandas, NumPy, Matplotlib
ML Techniques	Supervised Learning, Model Optimization, Feature Engineering
NLP	Text Classification, Resume Parsing, Named Entity Recognition
Deployment	REST APIs, Docker, Model Serving

Professional Experience

Machine Learning Engineer – DataNova Analytics (2023–Present)

- Designed and deployed ML models for automated resume screening and candidate ranking.
- Built NLP pipelines to extract skills, education, and experience from resumes.
- Improved candidate-job matching accuracy by 28% using feature engineering and model tuning.
- Integrated ML services into production APIs used by recruitment platforms.

Junior ML Engineer – AI Solutions Lab (2022–2023)

- Developed classification models using Scikit-learn and TensorFlow.
- Processed large datasets using Pandas and optimized training pipelines.
- Collaborated with backend teams to deploy ML microservices.

Projects

Resume Screening System

Built an NLP-based system that parses resumes and ranks candidates based on job requirements using TF-IDF and classification models.

Job Recommendation Engine

Developed a machine learning pipeline that matches candidates with suitable job postings using similarity scoring and supervised learning.

Education

B.Tech in Computer Science and Engineering – 2022

Relevant Coursework: Machine Learning, Data Mining, Artificial Intelligence, Natural Language Processing
